## KNIFESTYLES OF THE RICH & FAMOUS

### FOREHEAD

"Kim has no wrinkles, period — she must use copious amounts of Botox regularly," says Dr. Dima. "But it's dropped her brows, making them look a little heavy." Cost: \$2,000 a year.

### CHEEKS

Juvéderm injections (up to \$5,000) have pumped up the volume in Kim's face, reports Dr. Dima, who says it's filled out her cheeks, under-eye hollows and smile lines.

### SKIN

"Her complexion is flawless, so it's very likely she's had treatments with a noninvasive device like the eMatrix, which stimulates collagen and firms skin while evening out tone," notes Dr. Dima.

### BUST

"Having six children takes a toll, causing breasts to deflate and droop," says Dr. Lyle Back. "Replacing her implants with larger ones that are still proportional with her frame, as Kim has, was the right move."

# Kim's Stay-Young Reality

NOW

If there's one thing *Don't Be Tardy* star Kim Zolciak-Biermann seems to make time for, it's appointments with her cosmetic surgeon. And based on expert assessments, the *Real Housewives of Atlanta* alum has had a lot of them! Some aren't sur-

prising: Kim was open about opting for a second breast augmentation and a tummy tuck last September, less than a year after giving birth to twins. She even posted an "after" photo of herself in a bikini on Instagram, noting that she felt so much better in

a swimsuit. But thanks to a slew of work above the neck, the 37-year-old likely feels good about herself no matter what she's wearing. According to Dr. Dima, a cosmetic laser surgeon in Reston, Virginia, Kim is finding off aging with a host of noninvasive

measures — everything from Botox to fillers to lasers. But while Dr. Dima thinks the reality diva looks overdone and expressionless, Dr. Lyle Back, a Philadelphia-based plastic surgeon, who — like Dr. Dima — doesn't treat Kim, disagrees. "Her facial identi-

ty has been preserved and she looks elegant, natural and beautiful," he raves, giving special props to what looks like an "exquisitely done" nose job, a procedure Kim adamantly denies. "This is what plastic surgery is supposed to do." Bravo! **LS**

## The Man's View

BEFORE OR AFTER  
APPARENT BREAST IMPLANTS?

### Fergie

The singer appears to have amassed more than Grammy Awards over the years. She's also seemingly gained some bigger, um, girls. Guesstimates are that she went up two cup sizes, at a cost of \$8,500 to \$12,000, since 2001 (left). These enhanced lady lumps? They're definitely nothing for 40-year-old Fergie to cry about: Eighty-seven percent of guys we polled say her new cleavage hits a high note.

## MIRACLE IN A JAR

### SMALL WRINKLE-SMOOTHING WONDER

Bigger isn't necessarily better when it comes to hyaluronic acid, which eases wrinkles by plumping and moisturizing skin. This new serum is infused with super-minuscule molecules of the ingredient that travel deep to firm instantly.
