

KNIFESTYLES OF THE RICH & FAMOUS

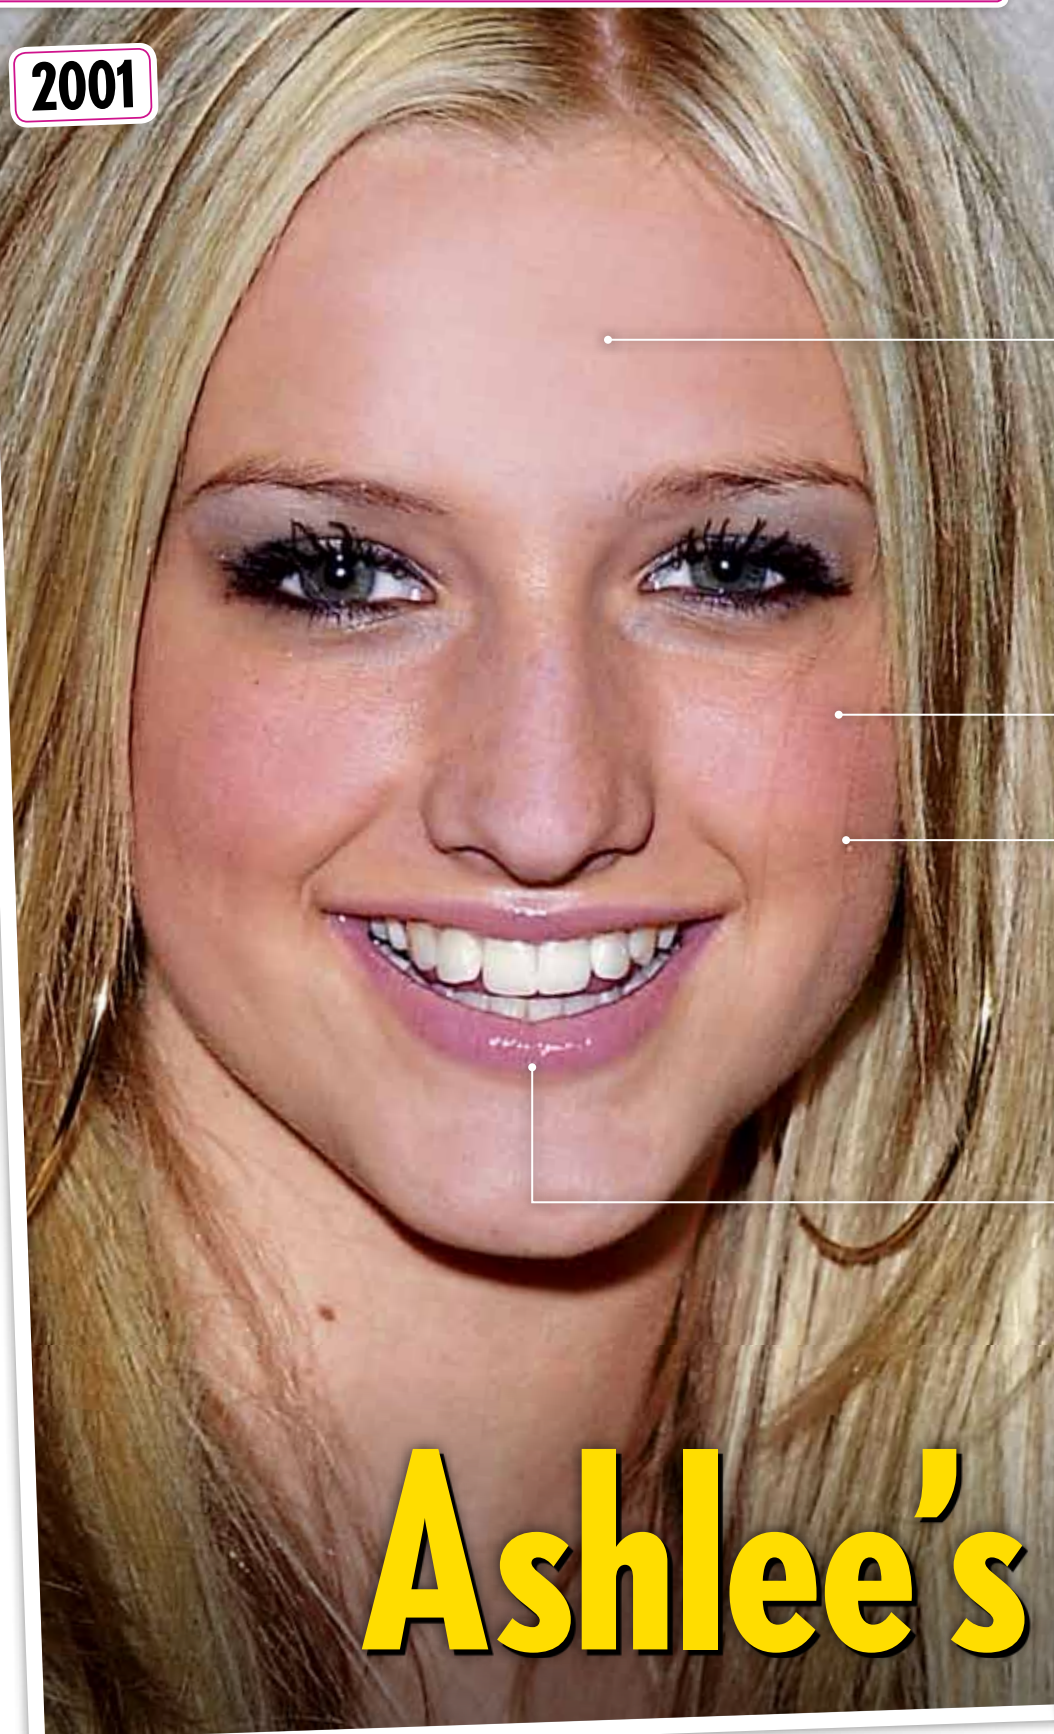

Growing up, Ashlee Simpson at times found herself in the shadow of big sister Jessica. But Ashlee, now 32, is a beauty in her own right. Did plastic surgery play a role? The surgeons we spoke to (none of whom have treated the mom of two) say yes. “Her eyes look wider, which can be done with Botox in the brow area,” says NYC-based dermatologist Dr. Gary Goldenberg, who also believes she’s had filler in the cheeks. “She looks thinner, but her cheeks are more uplifted,” he notes. NYC-based plastic surgeon Dr. Norman Rowe agrees and adds that she also has “clear and luminous skin,”

“She looks young and refreshed.”

which indicates a possible chemical peel or laser therapy. Her transformation likely began with a nose job. (Ashlee has been coy about the subject since the change was first noticed in 2006, calling surgery “a personal choice.”) “It looks like a very well-done rhinoplasty,” says Philadelphia-based plastic surgeon Dr. Lyle Back. “Very natural.” The same can be said for the rest of her work, says Dr. Rowe: “This is the perfect example of someone who is using treatments to enhance their beauty!” **LS**

2001

NOW

FOREHEAD
“Her forehead appears flat,” notes Dr. Goldenberg, who thinks Ashlee had Botox. Prices run between \$900 and \$1.2K, says the doc.

CHEEKS
The star has maintained her pillowy cheeks even after losing weight — a sign of filler treatment, says Dr. Goldenberg. Price tag? \$1.2K to \$2.4K.

SKIN
“Her ‘before’ photo shows more oiliness and larger pores on her skin,” says Dr. Goldenberg, who suspects either microneedling (\$1.2K to \$1.5K) or laser resurfacing (up to \$5K). Another option? A chemical peel (\$750).

LIPS
Dr. Steve Fallek suspects Ashlee has plumped her lips. “That would be around \$1K to \$2K, depending on how many syringes are used,” he says of the twice-a-year treatment.
